## October Safety Focus

During the month of October we focused on these fire prevention tips for at work and at home.

### Workplace Fire Safety

Every year in the United States there are 17,000 office and store fires that cause over \$800 million in direct property damage. Here are some tips to help prevent workplace fires, keep workers safe and keep businesses open.

- Eliminate fire hazards:**
  - Check for damaged or overloaded electrical outlets, cords and cables.
  - Keep anything that can burn away from electrical equipment.
  - Never leave portable heating devices unattended.
- Employees should:**
  - Post clear fire escape plans on every level of a building.
  - Teach employees about exit locations, escape routes, and fire protection equipment.
- Employers need to prepare for emergencies:**
  - Make sure smoke alarms and fire sprinklers are properly installed and working.
- If there is a fire:**
  - Call 911.
  - Notify co-workers of the fire.
  - Never use the elevator. Walk, don't run, down the stairs.
  - If you can't evacuate, remain calm. Seal door gaps with jackets or wait at the window.

For more information on fire safety in a variety of workplaces, visit [www.osha.gov](http://www.osha.gov).  
Visit [www.usfa.fema.gov](http://www.usfa.fema.gov) for more free fire-safety resources.

### Cook Safely!

## Prevent Kitchen Fires

Did you know?  
Cooking is the main cause of home fires and fire injuries. You can prevent cooking fires. Take these steps to keep your family safe!

- Stand by your pan:**  
If you leave the kitchen, turn the burner off.
- Watch what you are cooking:**  
Fires start when the heat is too high. If you see any smoke or the grease starts to boil, turn the burner off.
- Turn pot handles toward the back of the stove:**  
Then no one can bump them or pull them over.
- Keep a pan lid or baking sheet nearby:**  
Use it to cover the pan if it catches on fire. This will put out the fire.
